The Statistical Analysis Center

The Wisconsin Statistical Analysis Center is a program of the Wisconsin Council on Criminal Justice. The Center collects, analyzes, interprets and disseminates criminal justice data in Wisconsin.

The Center currently operates two major programs. The Uniform Crime Reporting Program, of which this publication is a part, entails the collection and analysis of crime and arrest data throughout the state. The Jail Information System collects and analyzes jail data from participating counties in Wisconsin.

In addition to operating these two programs, the Center also provides technical assistance to local criminal justice agencies. Further, it provides state and local government with access to federal resources in criminal justice statistical information. The Statistical Analysis Center also promotes the coordination and development of criminal justice statistical systems in Wisconsin.

Acknowledgements

Wisconsin Crime and Arrests - 1982 is the product of information provided by a variety of agencies. Without the excellent cooperation of the people in these agencies this publication would not have been possible. The Wisconsin Council on Criminal Justice gratefully acknowledges the assistance of Mr. William Walluks, Wisconsin Department of Justice, Crime Information Bureau; the University of Wisconsin, Madison Academic Computing Center; the Federal Bureau of Investigation, Uniform Crime Reporting Program; and especially the Administrators of local law enforcement agencies and their staff whose efforts made the data available.

Wisconsin Crime and Arrests - 1982 is a publication of the Wisconsin Statistical Analysis Center, a program of the Wisconsin Council on Criminal Justice. The Statistical Analysis Center is funded by a grant from the U.S. Department of Justice, Bureau of Justice Statistics.

Crime and Arrests in Wisconsin - 1982

Introduction

This report, prepared by the Wisconsin Statistical Analysis Center (SAC), presents data on crime and arrests in Wisconsin during 1982. From 1970 to 1980 the state Uniform Crime Reporting (UCR) Program, operated by the Crime Information Bureau of the Wisconsin Department of Justice (DOJ), collected, compiled, and reported crime and arrest data for Wisconsin. Beginning in 1971, DOJ also provided data to the national UCR system, a program of the Federal Bureau of Investigation (FBI). Effective December 31, 1981, the state program operated by DOJ was discontinued due to budget reductions. The 1981 data collected by DOJ were transmitted directly to the FBI, and the 1981 Wisconsin Crime and Arrests report, prepared by SAC, was based for the most part on information provided to SAC by the FBI. In 1982, Wisconsin law enforcement agencies transmitted their UCR data directly to the FBI, but in addition provided copies of the principal offense and arrest forms to the Statistical Analysis Center. This report is based on the data submitted to the SAC.

The National UCR Program

The national Uniform Crime Reporting program was initiated in 1930 by the International Association of Chiefs of Police (IACP). After soliciting input from law enforcement agencies throughout the country, an IACP committee developed uniform crime definitions and reporting procedures which could be used by law enforcement agencies in every state. The FBI was designated as the national clearinghouse for UCR data. The Committee on Uniform Crime Records of the IACP continues to serve the national program in an advisory capacity. In 1966 the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body to the program. The FBI regularly receives data on reported crime and arrests from law enforcement agencies throughout the country. The data are provided either by individual law enforcement agencies or by state UCR programs which collect and compile data for their states and convey the data to the FBI. From these data the FBI publishes its annual report, Crime in the United States.

The Wisconsin UCR Program

As indicated, the Wisconsin UCR program, which had been operated by DOJ, was discontinued in 1981. Wisconsin, therefore, does not currently have a state UCR program. The program operated by DOJ from 1970 to 1980 required that all law enforcement agencies submit UCR data either directly or through the county sheriff's office. It also required that DOJ submit the prescribed data to the FBI. DOJ expanded the national UCR program's classifications to collect more detailed and appropriate data on Wisconsin crime and arrests. From the statewide UCR data, DOJ published its annual report Wisconsin Crime and Arrests, as well as quarterly, semi-annual, and other summary reports.

In November 1981 the Wisconsin Council on Criminal Justice (WCCJ) received a grant from the United States Department of Justice, Bureau of Justice Statistics, to develop the Wisconsin Statistical Analysis Center. The SAC was mandated by executive order to collect and analyze criminal justice data, produce statistical reports on crime and the justice system, and promote the development of criminal justice information systems. SAC has

assumed a substantial number of the functions of the state UCR program to meet the information needs of state and local criminal justice decision-makers, elected officials, and interested citizens.

The 1982 Wisconsin Crime and Arrests Report

As stated earlier, this report is based on data provided to SAC by local law enforcement agencies. Local agencies provide SAC copies of four forms submitted by them to the FBI. These four forms are: the monthly return of offenses known to the police, the arson offense form, and the forms showing age, sex and race of persons arrested, for both adults and juveniles.

Unfortunately, data for all twelve months of 1982 were not available for every reporting agency. In general, the data presented in this report for individual jurisdictions are the reported data, with an indication of the number of months reported. County totals where appropriate and statewide totals, were estimated when there were instances of missing data. The problem of missing data is discussed in more detail on page 45 of this report.

The format of the present report is very similar to that of the 1981 report. Changes are noted in the text whenever a direct comparison of this report with the 1981 report might be inappropriate.

Issues in the Comparison of this with Earlier Reports

Care should be exercised in making comparisons of the data in this report with the data contained in previous annual reports. Adjustments may be required for the following reasons:

--Shifting of a law enforcement agency from one population category to another based on annual re-estimation of the jurisdiction's population.

--On occasion, the Federal Government designates an additional Wisconsin county as being included in a Standard Metropolitan Statistical Area. This could shift a Sheriff's Office from the Rural Areas Category to the Suburban Sheriff's group and shift the cities within the county from Non-Suburban Cities to Suburban Cities.

--Populations are estimated for non-census years. Rates for 1981 are calculated using 1980 census data.

--County totals shown in Tables 1-6 of this report are estimates which compensate for instances of missing data when appropriate. In the 1981 Wisconsin Crime and Arrests report, these totals were actual totals of data reported, even when data were missing. Thus, caution should be exercised in comparing county totals from 1981 and 1982.

--This report includes the most current 1981 data available. Both adult and juvenile 1981 arrest data for Milwaukee published in the 1981 Wisconsin Crime and Arrests have been revised. Readers interested in comparing 1981 and 1982 Milwaukee data are urged to contact SAC.

An Overview of 1981 and 1982 Crime and Arrests in Wisconsin

The following two tables present an overview of 1981 and 1982 crime and arrests in Wisconsin. The first table shows that every Index offense except robbery and aggravated assault declined from 1981 to 1982. Total Index offenses declined by 6.8 percent from 227,743 to 212,173. Property offenses declined by 7.2 percent from 218,809 to 203,098. Violent offenses however increased by 1.6 percent from 8,934 to 9,074. The increase in the violent crimes is due to the increase in robbery and aggravated assault, the two most numerous violent offenses. Comparable 1982 FBI figures for the entire United States show a four percent decrease in total Index offenses and in property crimes, and a three percent decrease in violent offenses.

In 1982, property offenses accounted for 96% of total Index offenses. The most frequent individual offense was theft, comprising 69% of total Index offenses. The least frequent was murder, the estimated 144 murders comprising less than 0.1 percent of total index offenses.

Total statewide juvenile and adult arrests are shown in the second table. The table shows that statewide, total arrests have decreased from 1981 to 1982 by 3.5 percent, from 259,220 in 1981 to 250,156 in 1982. This decrease is primarily accounted for by adult arrests, which decreased by 4.7 percent; juvenile arrests decreased by less than one percent.

An analysis of total Index offenses, violent offenses, property offenses, and each separate offense appears in the following section of this report. Ten-year trends in offenses, clearances and arrests are then presented.

ESTIMATED INDEX OFFENSES KNOWN TO WISCONSIN LAW ENFORCEMENT AGENCIES,[1]
1981 AND 1982

	1981[2]	1982	Percent Change
Murder	159	144	- 9.4
Forcible Rape	737	637	-13.6
Robbery	3,236	3,392	+ 4.8
Aggravated Assault	4,802	4,901	+ 2.1
TOTAL VIOLENT OFFENSES	8,934	9,074	+ 1.6
Burglary	50,851	46,661	- 8.2
Theft	156,060	146,509	- 6.1
Motor Vehicle Theft	10,293	8,678	-15.7
Arson	1,606	1,251	-22.1
TOTAL PROPERTY OFFENSES	218,809	203,098	- 7.2
TOTAL INDEX OFFENSES	227,743	212,173	- 6.8

ESTIMATED ARRESTS BY WISCONSIN LAW ENFORCEMENT AGENCIES
1981 AND 1982

	1981	1982	Percent Change
Juvenile Arrests	84,517	83,726	- 0.9
Adult Arrests	174,703	166,430	- 4.7
Total Arrests	259,220	250,156	- 3.5

[1] Data in this table are estimates. Data may not sum to totals due to rounding.
[2] Wisconsin 1981 data in this report may differ from data published in Wisconsin Crime and Arrests 1981 because of revised data submitted by local jurisdictions and because DNR arrests, not included in the 1981 report, are included in the 1981 data shown here.

WISCONSIN
CRIME CLOCK[1]
1982

One
CRIME INDEX
OFFENSE
every 2½ minutes

One
VIOLENT CRIME
every 1 hour

- One MURDER every 2½ days
- One FORCIBLE RAPE every 12 hours
- One ROBBERY every 3 hours
- One AGGRAVATED ASSAULT every 2 hours

One
PROPERTY CRIME
every 2½ minutes

- One BURGLARY every 11 minutes
- One THEFT every 3½ minutes
- One MOTOR VEHICLE THEFT every 1 hour
- One ARSON every 7 hours

[1] The crime clock should be viewed with caution. Since it is the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of index offense occurrence. This method of display does not imply a regularity in the commission of index offenses; rather it shows the ratios of crimes to fixed periods of time.

CRIME INDEX OFFENSES

Definition:[1] Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Attempts are included (an attempted murder is classified as an aggravated assault).

1982 Summary Analysis

- There were an estimated 212,173 Crime Index offenses reported during 1982, a 6.8 percent decrease from 1981.
- The rate of occurrence for total Index offenses in 1982 was 4,460.9 per 100,000 persons in Wisconsin. This is lower than the 1981 rate of 5,800 for the United States as a whole.
- In the population grouping of Wisconsin cities, the larger the population category, the higher the rate of Index offenses.
- Total Index offenses have increased by 58.1 percent between 1972 and 1982; the decrease in number of offenses from 1981 to 1982 is the first decrease in Wisconsin in the past five years.
- An estimated total of 56,676 persons were arrested for Index offenses in 1982. Of these, 53.8 percent of those for whom complete information was available were adults.
- Overall, 21.3 percent of Index offenses were cleared in 1982. This rate varies widely however from 74.4 percent for murder to 17.0 percent for burglary. Clearances solely involving juveniles comprised 37.3 percent of all clearances for Index offenses in 1982.

Total Index Offense Summary: 1981 and 1982[2]

Year	Number of Estimated Offenses	Rate per 100,000 Population
1981	227,743	4,839.7
1982	212,173	4,460.9
Percent Change	-6.8	-7.8

White	Adults Juveniles	22,210 20,734	39.4% 36.8%
Black	Adults Juveniles	7,464 4,658	13.2% 8.3%
American Indian	Adults Juveniles	544 653	1.0% 1.2%
Other	Adults Juveniles	94 31	.2%
TOTAL[7]		56,676	100.1%

Total Index Clearance Rates: 1981 and 1982

Year	Estimated Offenses	Percent Cleared-Total	Percent of Clearances Involving Only Juveniles
1981	227,743	20.8%	38.0%
1982	212,173	21.3%	37.3%

VIOLENT OFFENSES

Definition:[1] Four Crime Index Offenses involve face-to-face confrontation between victim and perpetrator, and are referred to as violent offenses. These are murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault.

1982 Summary Analysis

- There were an estimated 9,074 violent offenses reported during 1982, a 1.6 percent increase from 1981.
- The rate of occurrence for violent offenses in 1982 was 190.8 per 100,000 persons in Wisconsin. This is about one-third the 1981 rate per 100,000 of 577 in the entire United States. This means that about one out of 524 Wisconsin residents was the victim of a violent offense or attempted offense in 1982.*
- In the population grouping of Wisconsin cities the rate of violent offenses increased from 1981 to 1982 for all cities of over 10,000 population and decreased for cities of less than 10,000 population.
- Violent offenses have increased by 108.2 percent between 1972 and 1982; 1982 is the fifth consecutive year of increase in violent offenses in Wisconsin.
- An estimated total of 5,179 persons were arrested for violent offenses in 1982. Approximately 72.0 percent of those for whom complete information was available were adults.
- Overall, 54.0 percent of violent offenses were cleared in 1982. The clearance rate for violent offenses ranges from 74.4 percent for murder to 44.4 percent for robbery. Clearances involving solely juveniles comprised 20.3 percent of all clearances for violent offenses in 1982.

Violent Offense Summary: 1981 and 1982[2]

Year	Number of Estimated Offenses	Rate per 100,000 Population
1981	8,934	189.9
1982	9,074	190.8
Percent Change	+1.6	+0.5

* This risk factor can only be considered a general indication because a given person may be victimized more than once and, in the case of robbery, there may be a number of victims resulting from one offense.

1982	9,074	54.0	20.3

PROPERTY OFFENSES

Definition:[1] Four Crime Index offenses do not involve face-to-face confrontation between victim and perpetrator, and are referred to as property offenses. These offenses are burglary, theft, motor vehicle theft, and arson.

1982 Summary Analysis

- There were an estimated 203,098 property offenses reported during 1982, a 7.2 percent decrease from 1981.
- The rate of occurrence for property offenses in 1982 was 4,270.1 per 100,000 residents. This compares with a 1981 rate for the United States as a whole of 5,223.
- Property offense rates decreased from 1981 to 1982 for every Wisconsin population group, except for jurisdictions over 250,000, where property offenses increased.
- Property offenses have increased by 56.4 percent between 1972 and 1982; the decrease in number of offenses from 1981 to 1982 is the first decrease in the past five years.
- An estimated total of 51,500 persons were arrested for property index offenses in 1982. Approximately 51.9 percent of those for whom complete information was available were adults.
- Overall, 19.8 percent of property offenses were cleared in 1982. This rate varies from 17.0 percent for burglary to 28.9 percent for arson. Clearances solely involving juveniles comprised 39.4 percent of all clearances for property offenses in 1982.

Property Offense Summary: 1981 and 1982[2]

Year	Number of Estimated Offenses	Rate per 100,000 Population
1981	218,809	4,649.8
1982	203,098	4,270.1
Percent Change	-7.2	-8.2

1982	203,098	19.8	39.4

MURDER

Definition:[1] Murder and nonnegligent manslaughter, are the willful (nonnegligent) killing of one human being by another. The classification of this offense, as for all other Crime Index offenses, is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens during commission of the felony; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

1982 Summary Analysis

- There were an estimated 144 murders reported during 1982, a 9.4 percent decrease from 1981.
- Murder accounted for 0.07 percent of the total Crime Index and 1.6 percent of all violent index offenses.
- Approximately one murder was reported every 2½ days.
- The murder rate was 3.0 victims per 100,000 population compared to 3.4 per 100,000 in 1981.
- This 1982 rate of 3.0 per 100,000 contrasts with a 1981 rate of 9.8 per 100,000 in the United States.
- The 1982 murder rate was highest in cities over 250,000 and lowest in jurisdictions between 10,000-24,999 and suburban sheriffs' jurisdictions.
- Reported murders have averaged 142 since 1974.
- An estimated 184 persons were arrested for murder in 1982, 93.5 percent of whom were adults.
- The murder clearance rate decreased from 85.0 percent in 1981 to 74.4 percent in 1982.

Murder Summary: 1981 and 1982[2]

Year	Number of Estimated Offenses	Rate per 100,000 Population
1981	159	3.4
1982	144	3.0
Percent Change	-9.4	-11.8

FORCIBLE RAPE

Definition:[1] Forcible rape is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category. Further, it should be noted that forcible rape is not the same as sexual assault as defined in Wisconsin Statutes.

1982 Summary Analysis

- There were an estimated 637 rapes reported during 1982, a decrease of 13.6 percent from the 1981 figure.
- Rapes constituted 0.3 percent of all index offenses and 7.0 percent of violent index offenses.
- Approximately two rapes per day were reported in 1982.
- The rate of rape per 100,000 population was 13.4 in 1982. This represents a 14.6 percent decrease from the 1981 rate.
- This 1982 rate of 13.4 per 100,000 compares with a 1981 rate of 35.6 per 100,000 in the United States.
- The highest rape rates in 1982 were in cities over 50,000 while the lowest rates occurred in jurisdictions included in rural and suburban sheriffs' departments.
- Actual rape by force constituted 79.3 percent of all estimated rapes while attempted rape by force made up the remaining 20.7 percent.
- While the number of estimated rapes has increased 69.4 percent from the 1972 figure of 376, the increase from 1977 (600 estimated rapes) to 1982 is 6.2 percent.
- There were an estimated 396 persons arrested for rape in 1982. Approximately 80.3 percent of those for whom complete information was available were adults.
- The 1982 total clearance rate for rape was 58.0 percent, an increase from the 1981 figure of 53.5 percent.

ROBBERY

Definition:[1] Robbery is the taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

1982 Summary Analysis

- There were an estimated 3,392 robberies reported in 1982, a 4.8 percent increase from 1981.
- Robbery accounted for 1.6 percent of the total Crime Index and 37.4 percent of all violent index offenses.
- On the average, approximately nine robberies were reported each day.
- The robbery rate was 71.3 per 100,000 population in 1982, compared to 68.8 per 100,000 in 1981.
- This 1982 rate of 71.3 per 100,000 population compares with a 1981 rate of 250.6 per 100,000 in the United States.
- The 1982 robbery rate per 100,000 was highest in jurisdictions over 250,000 and lowest in rural sheriffs' jurisdictions.
- Patterns in the type of weapon used in robberies were nearly identical in 1981 and 1982 (see next page).
- The number of estimated robberies has increased approximately 45.2 percent from the 1978 figure of 2,336.
- An estimated total of 1,821 persons were arrested for robbery in 1982. Approximately 61.1 percent of those arrested were adults.
- The 1982 total clearance rate for robbery was 44.4 percent, a slight decrease from the 1981 figure of 46.6 percent.

AGGRAVATED ASSAULT

Definition:[1] Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury results when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

1982 Summary Analysis

- There were an estimated 4,901 aggravated assaults reported in 1982, a 2.1 percent increase over 1981.
- Aggravated assault accounted for 2.3 percent of the total Crime Index and 54.0 percent of all violent index offenses.
- One aggravated assault was reported approximately every two (2) hours.
- The aggravated assault rate was 103.0 per 100,000 population in 1982, compared to 102.0 per 100,000 in 1981.
- This 1982 rate of 103.0 for Wisconsin compares with a 1981 rate of 280.9 in the United States.
- The 1982 aggravated assault rate per 100,000 was highest in jurisdictions over 50,000 and lowest in rural sheriffs' jurisdictions.
- Patterns in the type of weapon used in aggravated assault were similar in 1981 and 1982.
- The number of estimated aggravated assaults has increased approximately 60.5 percent from the 1978 figure of 3,053.
- An estimated total of 2,778 persons were arrested for aggravated assault in 1982. Approximately 76.6 percent of those for whom complete information was available were adults.
- The 1982 total clearance rate for aggravated assault was 59.6 percent, a slight decline from the 1981 figure of 61.5 percent.

BURGLARY

Definition:[1] Burglary is defined as the unlawful entry of a structure to commit a felony or a theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

1982 Summary Analysis

- There were an estimated 46,661 burglaries reported in 1982, an 8.2 percent decrease over 1981.
- Burglaries accounted for 22.0 percent of the total Crime Index and 23.0 percent of all property index offenses.
- One burglary was reported approximately every 11 minutes.
- The burglary rate was 981.0 per 100,000 population in 1982, compared to 1,080.6 per 100,000 in 1981.
- This 1982 rate of 981.0 per 100,000 contrasts with a 1981 nationwide rate of 1,632.1 in the United States.
- The burglary rate was highest in cities over 25,000.
- Patterns in the type of entry for burglaries were similar in 1981 and 1982.
- The number of estimated burglaries has increased 10.3 percent from the 1975 figure of 42,305.
- An estimated total of 9,277 persons were arrested for burglary in 1982. Approximately 54.5 percent of those for whom complete information was available were juveniles.
- The 1982 total clearance rate for burglary was 17.0 percent, a slight decline from the 1981 figure of 18.0 percent.

THEFT

Definition:[1] Theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence or fraud occurs. In the Uniform Crime Reporting program, this crime category does not include embezzlement, "con" games, forgery and worthless checks. Motor vehicle theft is also excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

1982 Summary Analysis

- An estimated total of 146,509 thefts were reported in 1982. This figure is 6.1 percent less than in 1981.
- Thefts accounted for 69.0 of the total Crime Index and 72.1 percent of all property index offenses.
- One theft was reported approximately every 3½ minutes.
- The theft rate was 3,080.3 per 100,000 in 1982, down from 3,316.4 per 100,000 in 1981.
- This 1982 rate of 3,080.3 per 100,000 is slightly lower than the 1981 rate of 3,122.3 per 100,000 in the United States.
- The 1982 theft rate was highest in cities over 25,000 and lowest in both rural and suburban sheriffs' jurisdictions.
- The number of estimated thefts has increased 63.4 percent from the 1972 figure of 89,640.
- An estimated total of 39,359 persons were arrested for theft. Approximately 54.5 percent of those for whom complete information was available were adults.
- The 1982 total clearance rate of 20.4 percent was slightly higher than the 1981 rate of 19.2 percent.

MOTOR VEHICLE THEFT

Definition:[1] Motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

1982 Summary Analysis

- There were an estimated 8,678 motor vehicle thefts reported in 1982, a 15.7 percent decrease over 1981.
- Motor vehicle theft accounted for 4.1 percent of the total Crime Index and 4.3 percent of all property index offenses.
- One motor vehicle theft was reported approximately every hour.
- The motor vehicle theft rate was 182.5 per 100,000 population in 1982, down by one-sixth from 218.7 per 100,000 in 1981.
- This 1982 rate of 182.5 per 100,000 contrasts with a 1981 rate of 468.7 per 100,000 in the entire United States.
- The motor vehicle theft rate per 100,000 population was highest in jurisdictions over 250,000.
- Patterns in the types of vehicles stolen were nearly identical in 1981 and 1982.
- Estimated motor vehicle thefts have declined 31.1 percent from the 1979 figure of 12,587.
- An estimated 2,463 persons were arrested for motor vehicle theft in 1982. Approximately 64.6 percent of those for whom complete information was available were juveniles.
- The 1982 total clearance rate of 23.5 percent was somewhat lower then the 1981 rate of 26.5 percent.

Motor Vehicle Theft Summary: 1981 and 1982[2]

Year	Number of Estimated Offenses	Rate per 100,000 Population
1981	10,293	218.7
1982	8,678	182.5
Percent Change	-15.7	-16.6

Year	Estimated Offenses	Percent Cleared-Total	Percent of Clearances Involving Only Juveniles
1981	10,293	26.5	38.1
1982	8,678	23.5	35.2

ARSON

Definition:[1] Arson is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

1982 Summary Analysis

- There were an estimated 1,251 arsons reported in 1982, a 22.1 percent decrease over 1981.
- Arsons constituted 0.6 percent of the total Crime Index and 0.6 percent of all property index offenses.
- Approximately 3½ arsons were reported every day.
- The arson rate per 100,000 population was 26.3 in 1982, compared to 34.1 per 100,000 in 1981.
- The arson rate per 100,000 population was highest in cities over 50,000.
- An estimated total of 401 persons were arrested for arson in 1982. Approximately 56.6 percent of those for whom complete information was available were juveniles.
- The 1982 total clearance rate for arson of 28.9 percent was somewhat less than the 1981 rate of 30.6 percent.

Arson Summary: 1981 and 1982[2]

FOOTNOTES

1 All Index offense definitions are those used by the National Uniform Crime Reporting Program.

2 Figures in this and subsequent tables are estimated from available data. Figures may not add exactly due to rounding.

3 Data from two jurisdictions (i.e., Wisconsin State Patrol and the Department of Natural Resources) are excluded from this table.

4 Reported offenses from the various campuses of the University of Wisconsin are included in the population group of the city where the campus is located. Figures for 1981 reported in these tables have been revised as appropriate for purposes of comparison with 1982.

5 "Suburban Sheriffs' Departments" include the following counties: Brown, Calumet, Chippewa, Dane, Douglas, Eau Claire, Kenosha, LaCrosse, Marathon, Milwaukee, Outagamie, Ozaukee, Racine, Rock, St. Croix, Sheboygan, Washington, Waukesha and Winnebago.

6 Sex and age figures may not sum to this total because of changes requested by local jurisdictions to Tables 5 and 6. See page 84.

7 Race and age figures may not sum to this total because of changes requested by local jurisdictions to Tables 5 and 6. See page 84.

Summary of Offense and Arrest Trends: 1972 - 1982

The following four tables present statewide data on 1) the number of Index offenses, 2) offense rates for Index offenses, 3) clearance rates for Index offenses, and 4) the ratio of arrests to offenses for Index offenses for each year from 1972 through 1982. Each table shows percent change from 1972 to 1982. Certain adjustments, noted in footnotes to each table, were made in the total Crime Index and property offense categories to make the data comparable from year to year.

The total number of known Index offenses in Wisconsin increased sporadically from 1972 through 1981, but decreased in 1982 for the first time in five years. The number of Index offenses increased by 58.1 percent for the decade, from 133,381 in 1972 to 212,173 in 1982.[1] The increase in offense rates for the decade is slightly less than the increase in number of offenses, because the population of the state increased approximately 5.2 percent during this period.

The number of violent offenses increased by 108.2 percent for the decade, from 4,359 in 1972 to 9,074 in 1982. The number of property offenses increased by 56.4 percent for the decade, from 129,022 to 203,098. Thus, violent offenses increased nearly twice as fast as property offenses during the past decade. The increase in number of violent offenses is almost entirely due to the increase in robbery and aggravated assault, both of which more than doubled during the past decade. In terms of rates however, the frequency of aggravated assault did double while the rate of robbery did not.

Clearance rates for all offenses but one have declined over the past decade as the number of offenses has risen. The exception is forcible rape, for which the clearance rate has increased from 54.3% in 1972 to 58.0% in 1982.

Arrest ratios for all offenses are higher in 1982 than in 1981. This increase has resulted from the number of arrests remaining constant, while the number of offenses have declined. Arrest ratios for all but two offenses have declined during the past decade, indicating that during this time arrests have not increased as rapidly as offenses. The two exceptions are arrests for murder and for rape, for which the number of arrests has increased proportionally more than the number of offenses. For rape, this increase in arrests is paralleled by an increase in the number of clearances, however this is not the case for murder, where the clearance rate has declined while the arrest ratio has increased. Change in the arrest ratio over the past decade for the violent offenses is roughly parallel to the change in clearance rates. For property offenses however, clearance rates have dropped more than the arrest ratio. Thus, clearance rates have dropped despite an increase in the relative number of arrests.

---

[1] The numbers used in this section are taken from the four tables that follow. As noted in the footnotes to the tables, the 1982 Total Index and property offense figures include arson data but, since the 1972 data do not include arson, the 1972 to 1982 percent change figures do not reflect those additional 1982 offenses.

NUMBER OF OFFENSES, STATE OF WISCONSIN, 1972-1982

Arson[3]	--	--	--	--	--	--	--	30.2%	24.1%	29.8%	32.1%	--

[1] 1981 and 1982 figures are estimates; see text for further details.
[2] Theft of less than $50 value was not an Index offense until 1973. In this table the arrest ratios for thefts of less than $50 value are included in the 1972 total Index, Property offense, and theft arrest ratios to maintain comparability over the eleven year period.
[3] Arson was not reported as an Index offense until 1980. In this table arson arrest ratios are included in the total Index and Property offense arrest ratios for 1980 through 1982 but they are not reflected in the present change from 1972 to 1982.

Index Offenses by County and Municipality - 1982

Table 1 shows Index offenses for 1981 and 1982 and percent changes from 1981 to 1982 for each jurisdiction. The four violent index offenses are totaled to equal violent crimes, and the four property index offenses are totaled to equal property crimes. The Crime Index is the sum of all eight offenses.

In Table 1 the number of months of data reported for each jurisdiction is listed. This information is vital to the interpretation of the table since the data presented are the reported data at the jurisdiction level, even when fewer than twelve months of data were available. Twelve months of data were reported for 70% of the jurisdictions, while eleven months or more were reported for 78% of the jurisdictions.

Data for a jurisdiction which reported for fewer than twelve months in 1982 cannot be directly compared with that jurisdiction's 1981 data or with data for other jurisdictions. Thus, no percent changes are shown for these jurisdictions. However, an approximate comparison can be made using an estimate of the twelve month total. This estimate can be calculated by multiplying the available data by a correction factor which is obtained by dividing twelve by the number of months reported. (For example, if nine months of data are available for an agency, the data can be estimated for twelve months by multiplying the data by 12/9 or 1.33.) However, the accuracy of this approximation diminishes when only a few months of data are available. It should be applied with great caution when less than six months of data are available. This method should also be applied with caution when the number of offenses involved is small. For example, if jurisdiction A had 72 thefts in nine months and prorated them to 96 (12/9 x 72 = 96) thefts for the year, while jurisdiction B had three thefts in nine months and prorated them to four thefts for the year, the estimate for jurisdiction A would be more reliable because it had a higher number of offenses.

The percent change in the number of index offenses reported from 1981 to 1982 is shown in Table 1 for each jurisdiction for which it was possible to calculate the change. The percent change is calculated using the formula:

$$\frac{(\text{Offenses in 1982}) - (\text{Offenses in 1981})}{\text{Offenses in 1981}} \times 100 = \text{percent change}$$

If the number of offenses for 1981 was zero, no percent change was calculated since percent change cannot be calculated from a zero base. In addition, as stated above, no percent change was calculated for a jurisdiction unless twelve months of data were available for both 1981 and 1982.

Table 1 shows county totals for each offense and percent change from 1981 to 1982. For those counties in which not every jurisdiction reported twelve months of data for 1981 or 1982, the county totals shown are estimates. The estimated county totals were obtained by summing the estimated annual totals for each jurisdiction within the county. These estimated annual totals were obtained as described above, by multiplying the available data by a correction factor. When no data at all were available for a jurisdiction for 1982. 1981 data were used as the 1982 estimate. When estimates are used for county totals, the totals are so labelled in Table 1 (e.g., the notation "(EST)" follows the total for Ashland County).

At the end of Table 1, statewide totals of reported offenses in each category and estimates of the actual statewide totals are shown. The statewide estimates were obtained by summing the estimated offenses for each jurisdiction.

Table 2 presents offense rates per 100,000 population for index offenses for each jurisdiction. The populations shown in this table are from Official Population Estimates for 1982, published by the Demographic Services Center of the Wisconsin Department of Administration. The population shown for each county sheriff's office is the total population of the county minus the populations of any municipalities in the county for which UCR data were reported separately. The rates shown in Table 2 are derived by taking the number of reported offenses, shown in Table 1, dividing by the population of the jurisdiction, shown in Table 2, and multiplying by 100,000. These rates permit comparisons among jurisdictions of different sizes.

As discussed in connection with Table 1, twelve months of data were available for 71% of jurisdictions. Since offense rates based on less than twelve months of data would be misleading, Table 2 presents rates only for those jurisdictions which reported twelve months of data. The county-wide and statewide rates shown in Table 2 are based on estimated numbers of offenses when necessary, as described in connection with Table 1.

Table 3 presents total clearance rates by offense and jurisdiction. Note that the 1981 edition of Wisconsin Crime and Arrests showed both total and juvenile-only clearance rates in Table 3. This year, Table 3 presents only total clearance rates, while clearance rates for juveniles are shown separately in Table 4.

In Table 3, the total clearance rate is the number of clearances, divided by the number of offenses and multiplied by 100. That is, clearances are represented as a percentage of reported offenses. Note that no clearance rate can be calculated for an offense category if there are no 1982 offenses reported, even though there may be reported clearances of prior years offenses. When no offenses have been reported, a blank space appears in Table 3. When a clearance rate of zero is shown, it means that at least one offense occurred, but that there were no clearances.

Since the clearance rate is the ratio of clearances to reported offenses, it is not particularly sensitive to the problems of missing data described above for Tables 1 and 2. It is reasonable to assume that this ratio would be fairly constant as long as the number of months of data available was reasonably large. Thus, clearance rates have been presented in Table 3 for all jurisdictions for which six months or more of clearance data were present. There were 38 jurisdictions (14% of the total) reporting fewer than six months of data and which were excluded from the table. An asterisk is printed next to the name of each of these jurisdictions.

County-wide and statewide rates shown in Table 3 are based on estimated clearances and offenses, calculated as described above in connection with Table 1, except that clearance and offense data for jurisdictions reporting no data at all for 1982 are not included in the estimated ratios. Since county estimates could be misleading if a large proportion of data were missing, they are not printed for those counties in which jurisdictions with less than six months of data make up more than a third of the county population. A number sign (#) is printed when county estimates are omitted for this reason.

Table 4 presents information on those clearances in which only juveniles were involved. In Table 4, juvenile-only clearances are presented as a percentage of all clearances for each offense. Note that this is a change from the definition used in the 1981 Wisconsin Crime and Arrests report, when juvenile-only clearances were presented as a percent of offenses. In the present report, the practice used in Wisconsin Crime and Arrests reports through 1980 is resumed and juvenile-only clearances are presented as a percent of total clearances. In Table 4, when a clearance rate of 0 is shown, it means that there was at least one clearance, but there were no juvenile clearances. When no clearances at all have been reported, a blank space appears in the table. In all other respects, Table 4 is constructed in the same way as Table 3 and all comments regarding Table 3 are relevant to Table 4.

'#' INDICATES THAT LESS THAN 6 MONTHS OF CLEARANCE DATA ARE PRESENT FOR JURISDICTIONS THAT REPRESENT MORE THAN 33.3% OF THE TOTAL COUNTY POPULATION

Arrests by County and Municipality - 1982

Tables 5 and 6 present data on adults and juveniles arrested by Wisconsin law enforcement agencies during 1982. The tables present the total number of arrests, the total number of Part I arrests, the total number of Part II arrests, and the number of arrests for each Part I offense for each reporting agency for adults and juveniles respectively. Table 6 also presents the total number of juvenile arrests for status offenses. Status offenses are those which are only offenses because the offender is a juvenile. The UCR offenses considered to be status offenses are liquor law, curfew, and runaway violations. Since status offenses are Part II offenses, they are also included in the total number of Part II arrests. The number of Part II arrests for offenses other than status offenses can be found by subtracting the number of status offense arrests from the number of Part II arrests.

As indicated in the introduction to this report, data are not available for all twelve months of 1982 for every reporting agency. In Tables 5 and 6 the number of months of arrest data available for each reporting agency is listed. Although only the known data are presented for each jurisdiction, an estimated yearly total can be calculated for any jurisdiction with less than twelve months of data reported. The estimated totals can be calculated by multiplying the numbers in the table by a correction factor which can be obtained by dividing twelve by the number of months of data reported. (Thus, if eleven months of data are presented for an agency, for example, the agency's figures should be multiplied by 12/11, or 1.09.) Naturally, the more months of data reported, the more accurate will be the yearly estimates. Estimates based on a small number of months of reported data should be interpreted cautiously.

Tables 5 and 6 show, for each county, county total arrests for each offense. For those counties in which not every jurisdiction reported twelve months of data for 1982, the county totals shown are estimates. These estimates were obtained as in Table 1, by calculating and summing the estimated annual totals for each jurisdiction within the county. As in previous tables, when estimates are used for county totals, the notation "(EST)" follows the "County Total" label.

At the end of each table there are statewide totals of the reported arrests in each category and estimates of the actual statewide totals. The estimated totals were obtained by calculating estimated yearly totals, as described above, for each reporting agency with less than twelve months of data and summing the estimates for these agencies and the reported figures for the other agencies.

These tables also contain population figures for each jurisdiction. Table 5 contains adult population figures. Table 6 contains juvenile population figures. The juvenile population figures were derived from 1982 population estimates using adult and juvenile population proportions provided in the 1980 census. The population figures presented for county sheriffs' offices are the county populations minus the populations of any municipalities in the county for which UCR data are reported separately. These figures, based on the Official Population Estimates for 1982, Wisconsin Department of Administration, Demographic Services Center, can be used to calculate arrest rates for any of the jurisdictions or the State. Arrest rates are calculated by dividing the number of arrests by the relevant population and multiplying the quotient by 100,000. This rate per 100,000 is comparable across jurisdictions of varying size.

* READERS WHO WISH TO COMPARE THESE DATA WITH 1981 MILWAUKEE DATA SHOULD CONTACT SAC FOR FURTHER INFORMATION.

Statewide Arrests, by Offense

The following two tables present statewide data on adult and juvenile arrests in Wisconsin during 1982. The tables are listings of the UCR adult and juvenile arrest forms that are submitted by law enforcement agencies each month. As such, they show the total number of adult and juvenile arrests for each offense by sex, age, and race. Like other state and county level data presented in this report, these tables present estimated totals. Note that the statewide arrests in the 1981 Wisconsin Crime and Arrests report showed actual, reported data, rather than estimates. In order to make comparisons between these tables and the analogous tables from the 1981 report, the 1981 data must first be adjusted as described in the 1981 report.

Note that the state total in these listings is lower than the corresponding totals shown in Tables 5 and 6. This is because of increases or decreases made to Tables 5 and 6, at the request of local jurisdictions, which could not be included in the detailed statewide listings.

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants, are not scored. Included are those persons released without having been formally charged (See Juvenile Arrest).

ARREST RATE: The number of arrests for a particular offense, or group of offenses, per 100,000 population. The formula is:

$$\frac{\text{Number of Arrests}}{\text{Population}} \times 100{,}000$$

CLEARANCE: An offense is cleared, or solved for crime reporting purposes, when at least one person is arrested, charged with commission of the offense and turned over to the court for prosecution. Provision is also made for clearance in certain "exceptional" situations.

CLEARANCE RATE (TOTAL): The number of clearances divided by the total number of offenses, expressed as a percent. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100\%$$

Offenses are reported as they become known to law enforcement agencies. Clearances are scored as they are made. Therefore, it is possible for the clearance rate to exceed 100 percent for a time period. Both clearances by arrest and exceptional clearances are included.

CRIME FACTORS: Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. No definitive conclusions have yet been reached; many factors affect the volume and type of crime that occurs from place to place. Caution should therefore be exercised in comparing statistical data of individual communities or counties solely on the basis of their population.

More appropriate use can be made of the statistics by relating the experience of a particular area to group averages, or by employing a ranking procedure, and encompassing both crime and other socio-economic information.

CRIME INDEX: The total of eight serious offenses used as indicators of crime. Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft and arson. Definitions of each of these offenses are given in the section "Statewide Index Offenses and Arrests."

JUVENILE: A person under 18 years of age.

JUVENILE ARREST: Juveniles are scored as having been "arrested" for purposes of Uniform Crime Reporting procedures, although under Wisconsin Statutes law enforcement custody of a child is not legally considered an arrest. Arrests, in the case of juveniles, include those who have committed a crime and are taken into custody under circumstances such that were the juvenile an adult, an arrest would be scored. All violations by juveniles where some police or other official action is taken beyond a mere admonishment, including status offenses, are included. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored as being arrested if they have not committed a crime. (See Arrest.)

JUVENILE CRIME: Two different measures are available through Uniform Crime Reporting. They are juvenile arrests (number, rate, and percentage of total arrests), and juvenile involvement in clearances (juvenile clearance rate).

JUVENILE INVOLVEMENT IN CLEARANCES: The percent of clearances for a given offense involving only juveniles.

$$\frac{\text{Number of Clearances Involving Only Juveniles}}{\text{Total Number of Clearances}} \times 100\%$$

OFFENSE RATE: The number of known offenses per 100,000 population. The formula is:

$$\frac{\text{Number of Offenses}}{\text{Population}} \times 100{,}000$$

Offense rates per population unit are employed to remove the effect of differing sizes of law enforcement service areas, permitting the examination of reported crime on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring offenses from being unmeaningfully low.

More sophisticated crime or victimization rate measures may also be utilized, such as residential burglaries per 100,000 residences, motor vehicle thefts per 100,000 registered vehicles, or forcible rapes per 100,000 females in typically victimized age groups.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period} - \text{Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: Totals as well as juvenile and adult sub-totals are based on Official Population Estimates for 1982, Wisconsin Department of Administration, Demographic Services Center. Population for 1981 (used in this report for computing 1981 rates) was population reported in the 1980 census.
